

JOSHUA THALAPPILLIL

jthalappillil7@gmail.com · 0431293152

TECHNICAL SKILLS

Programming Languages:	Python, TypeScript, JavaScript, HTML, CSS, Java
Frameworks:	Angular, Django Rest Framework, React, Node.js
Developer Tools:	VS Code, Postman, SMTP4dev, Git, IntelliJ, DBeaver, pgAdmin, WSL2, Docker
Libraries:	PrimeNG, react-router, Bootstrap

WORK EXPERIENCE

Datacom

Software Engineer

2023 - Present

- Designed, developed and maintained scalable features in Zeus for government clients across Australia and New Zealand using **Angular (TypeScript)** and **Django Rest Framework (Python)**
- Contributed to the full software development life cycle, including code reviews, **CI/CD**, migrations, and weekly production deployments
- Built reusable **Angular** components, integrating authentication context, API data fetching, error handling, and global table filtering with **PrimeNG**
- Automated internal feedback workflows within Zeus by building a custom Jira integration (JiraViewSet and **Angular** components), enabling real-time bug reporting and feature suggestions
- Designed and built **RESTful API** endpoints with **Django Rest Framework**
- Led creation of a Python-based automation suite using Playwright for pre and post upgrade testing, including user authentication and data validation. Integrated Zeus' API to automate creation and deletion of test sites, hosts and circuits. Containerised in **Docker**
- Collaborated daily in Agile standups and sprint planning sessions to ensure alignment and timely delivery of features

Royal Melbourne Hospital

Health Information Manager

Dec 2021 - Apr 2022

- Conducted data quality audits to identify deficiencies in Activity Based Funding. Create and submit reports for Victorian Agency for Health Information to rectify lost funding
- Designed and executed system training programs for clinicians to elevate data quality standards
- Managed small team of clerical staff for hospital administrative tasks

PROJECTS

Zeus 4.0

Zeus is a Datacom-built tool for network automation, orchestration, and insights. Zeus provides core functionality such as inventory management, security oversight, project handovers, and reporting.

Website Portfolio *JavaScript, React, tsParticles, HTML & CSS* <https://portfolio-resume-three.vercel.app/>
Developed a frontend website portfolio

Freelance - 11.11artistystudio

<https://11-11artistystudio.com/>

Created and deployed a website for a lash business using Angular. Embedded Acuity scheduling and will activate and update website when business is ready.

PokeDex

JavaScript, PokeAPI, HTML & CSS

<https://github.com/Josh-Thalappillil/pokedex>

Developed dynamic Pokemon web application, using PokeAPI. Implemented features such as Pokemon data fetching, animations, and a user friendly pokemon interface.

EDUCATION

University of Helsinki

Java Programming

- 2023

The Odin Project

Coding Bootcamp: Foundation of Full-Stack Development

- 2022

La Trobe University

Double Bachelor's of Information Management & Health Sciences

Jan 2018 - Dec 2021
